

DataPower

Common Applications

Alan Philpott & Dan Mudge

4th March 2008

Introduction

Presenters

Who are we?

- Alan Philpott
 - Senior Developer
- Dan Mudge
 - Lead Consultant

Common Applications of DataPower Presentation Structure

- Introduction
 - DataPower and Smart421
- Part 1: DataPower Overview
- Part 2: Common Usage Scenarios

Introduction

DataPower & Smart421

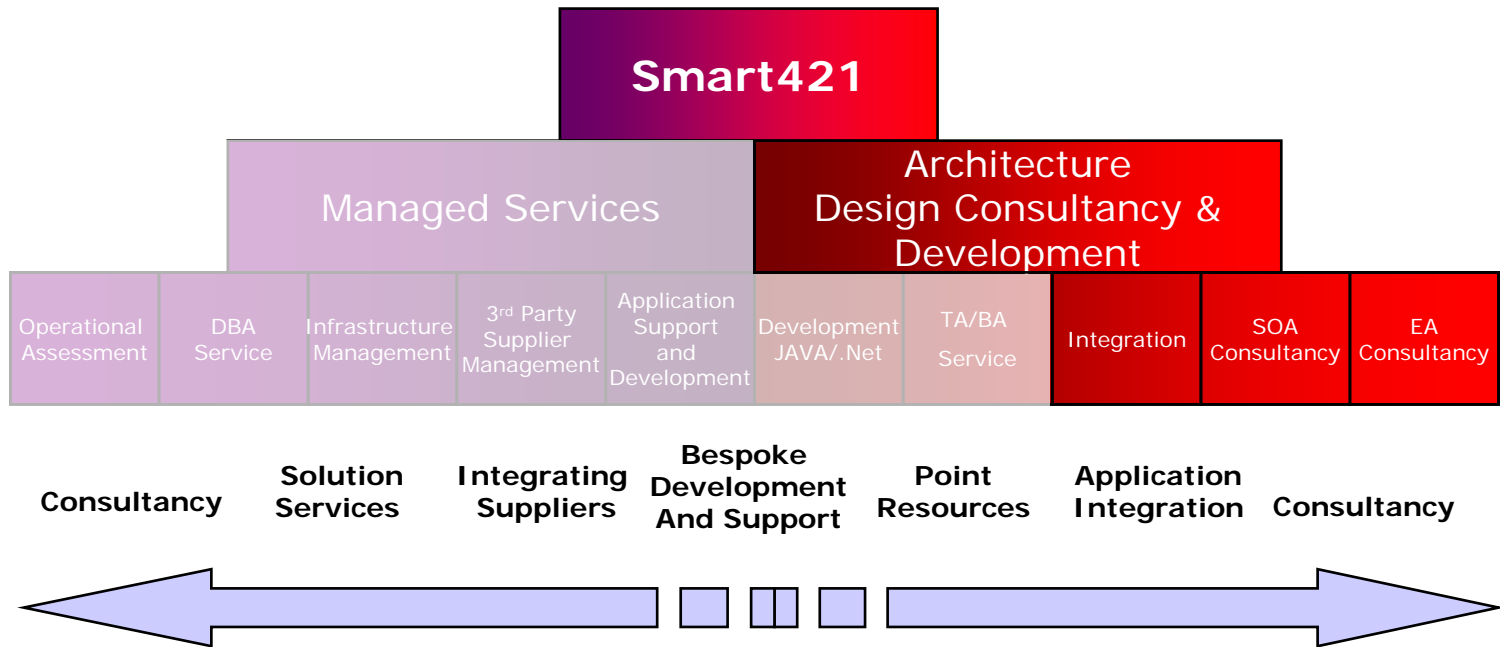

Smart421

Who are we?

- IBM Premier/Tier One Partner
- Official IBM DataPower Reseller
- Solution Integrator (Insurance, Utilities, Telco.)

Smart421 Who are we?

Part One

DataPower Overview

SOA Appliance

What is it?

- U1 Rack-mountable network device
- Purpose built to perform common SOA functions
- Service / Application Security and Integration
 - Industry Standard Security and Transport Support

Available Models

DataPower comes in three flavours, each one building on the feature set of the one before.

XML Accelerator XA35

XML Security Gateway XS40

Integration Appliance XI50

XML Accelerator XA35

Feature Overview

A Subset...

- XML Parsing Acceleration
- XML Transformation Acceleration
- SSL Acceleration
- Schema Validation

XML Security Gateway XS40

Feature Overview

Everything from the slide before plus

- XML Firewall
 - Message Routing
- Threat Protection
 - Denial Of Service, SQL Injection
- Message and Field Level Security
 - Encryption, Decryption and
- Authentication, Authorisation
 - LDAP, WS-Security, SAML, S

Billion Laughs XML

```
<?xml version="1.0"?>
<!DOCTYPE billion [
<!ELEMENT billion (#PCDATA)>
<!ENTITY laugh0 "ha">
<!ENTITY laugh1 "&laugh0;&laugh0;">
<!ENTITY laugh2 "&laugh1;&laugh1;">
<!ENTITY laugh3 "&laugh2;&laugh2;">
...more entities here ...
<!ENTITY laugh24 "&laugh23;&laugh23;">
<!ENTITY laugh25 "&laugh24;&laugh24;">
<!ENTITY laugh26 "&laugh25;&laugh25;">
<!ENTITY laugh27 "&laugh26;&laugh26;">
<!ENTITY laugh28 "&laugh27;&laugh27;">
<!ENTITY laugh29 "&laugh28;&laugh28;">
<!ENTITY laugh30 "&laugh29;&laugh29;">
]
<billion>&laugh30;</billion>
```

Integration Appliance XI50

Feature Overview

Everything from the slide before plus...

- Protocol Bridging
 - HTTP, HTTPS, MQ, JMS etc.
- Multi-Protocol Gateway
- Transformation between XML & Non-XML Formats

Overview Conclusion

Key DataPower Features

- Acceleration
 - Dedicated processing for typical XML processing
- Security
 - Support for an extensive list of security methods
- Integration
 - Protocol Bridging, Multiples Protocols
- Standards!

Part Two

Common Usage Scenarios

Common Usage Scenarios

- Scenario 1: Web Service Proxy
- Scenario 2: Legacy Integration
- Scenario 3: Securing Web Applications

Scenario One

Web Service Proxy

Scenario One: Web Service Proxy

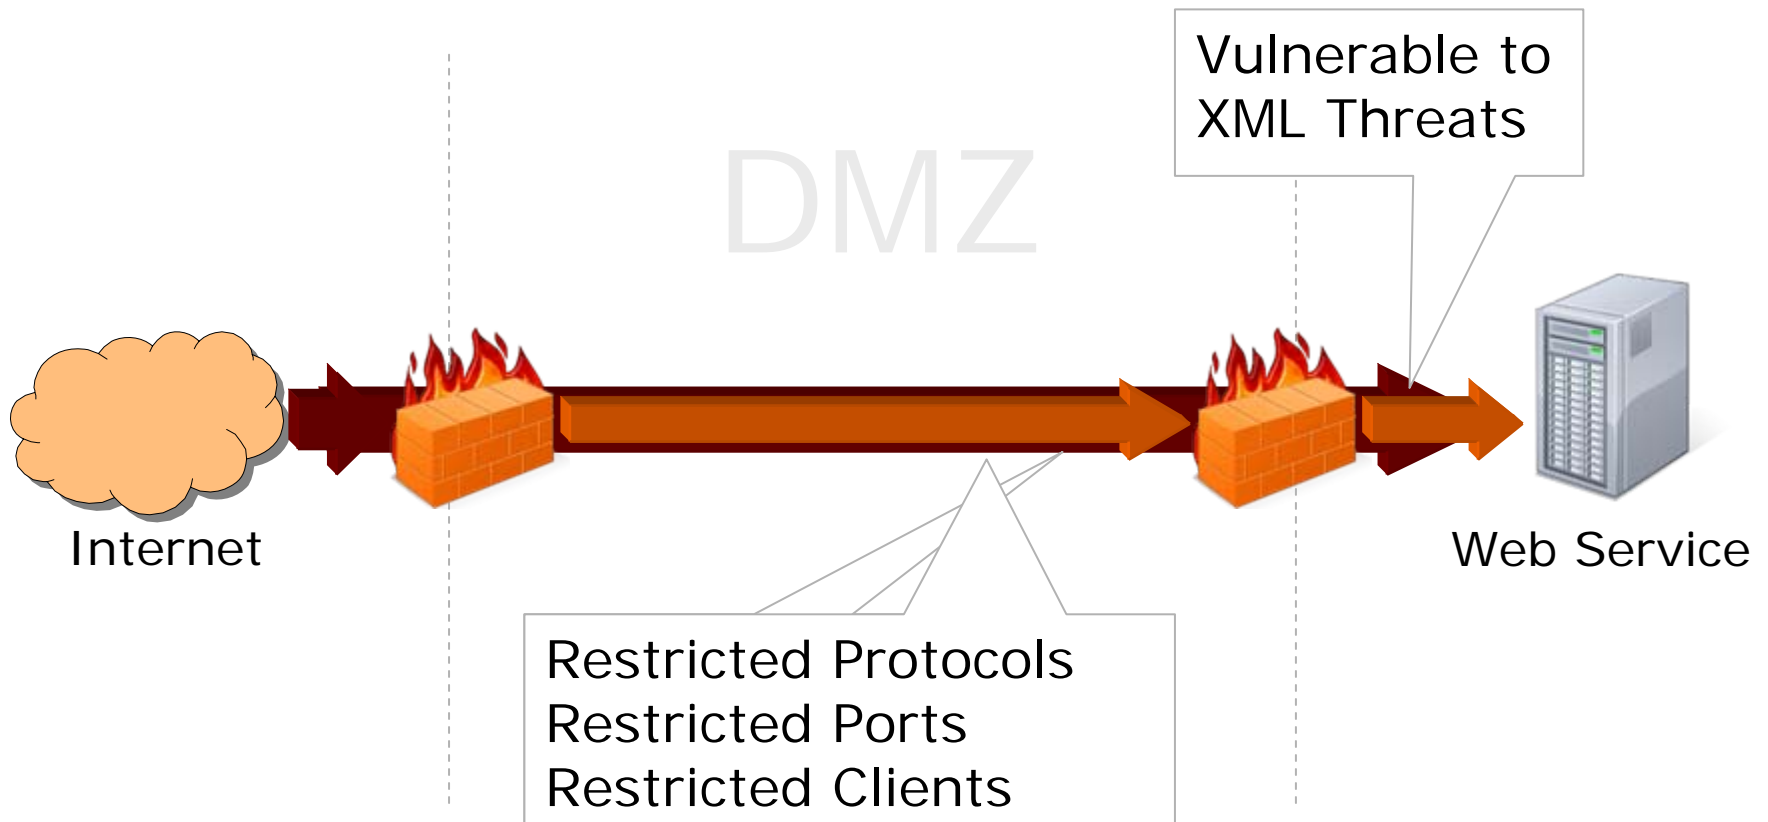

Problem

- Web Service Exposed to XML
 - Denial of Service Attack ,Dict
- Unsecured Web Services
 - User and / or role based acce
- Service Level Agreements
 - Bronze, Silver and Gold subscription levels

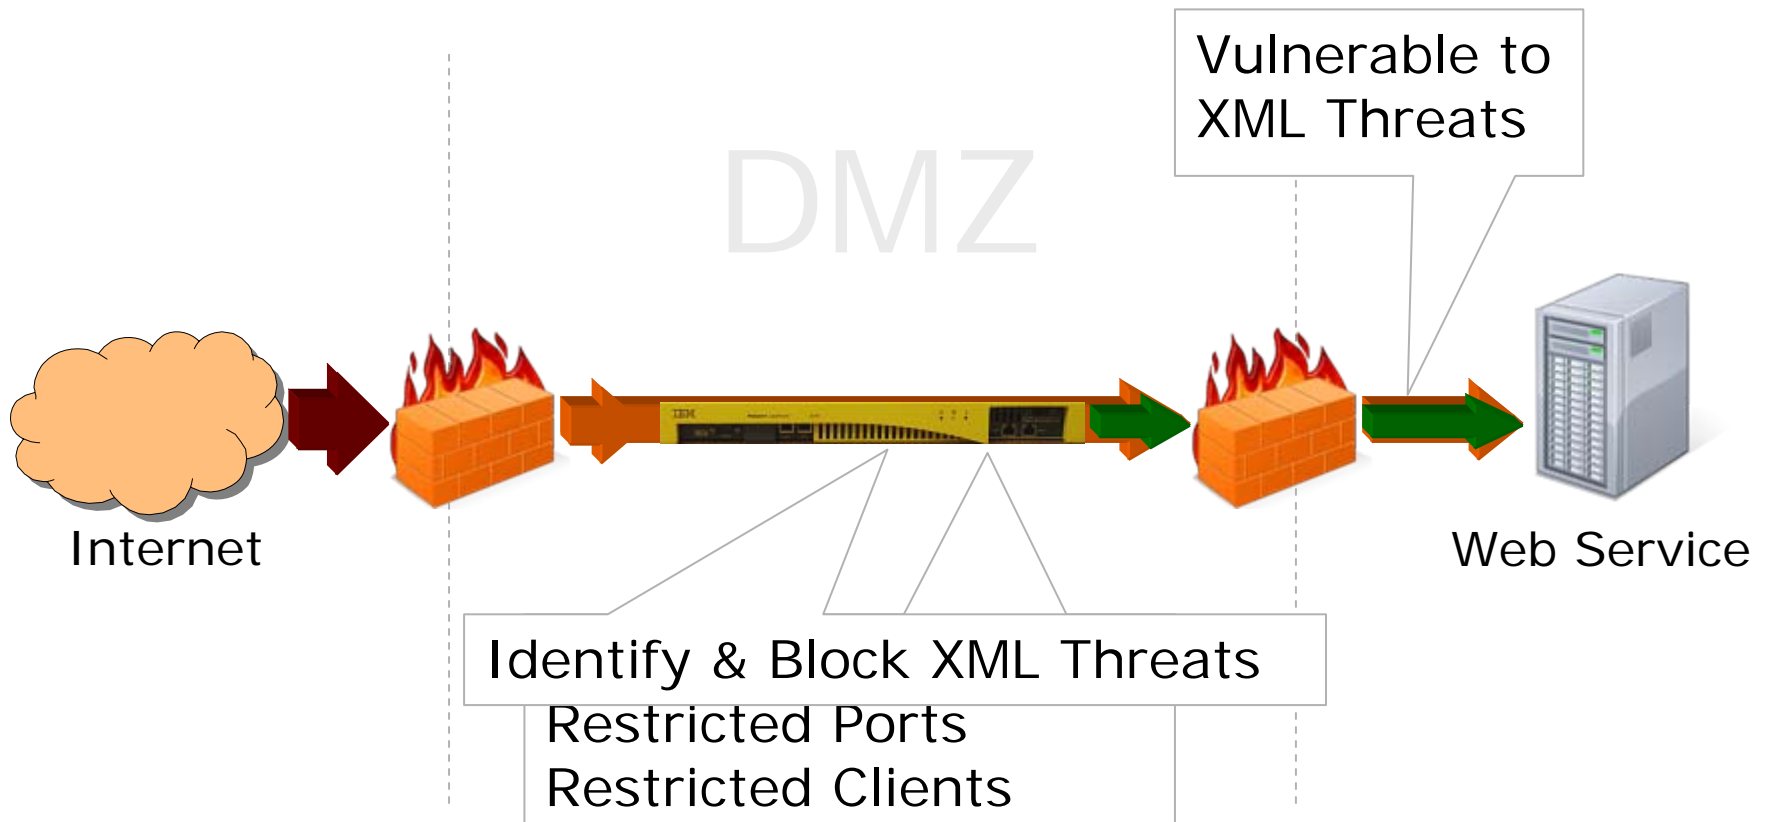

Protect Backend Servers from excessive load.

Reuse Infrastructure for all service consumers.

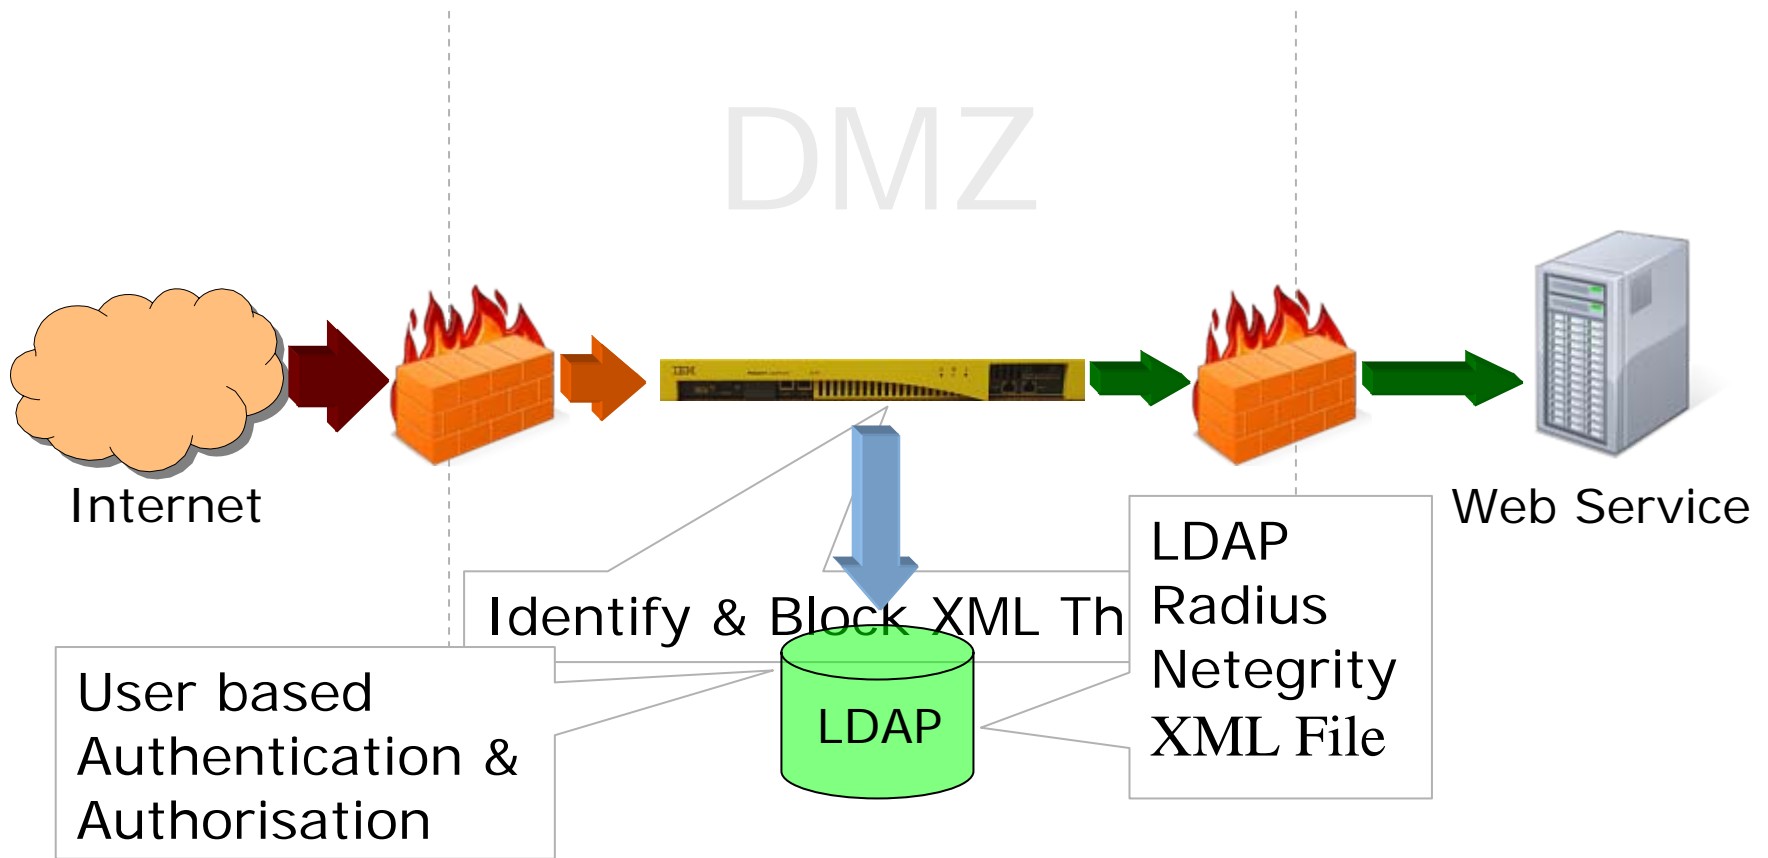

Scenario One: Web Service Proxy

Scenario One: Web Service Proxy

Scenario One: Web Service Proxy

Scenario One: Web Service Proxy

Scenario One: Web Service Proxy

Solution

- XML Threats Rejected by XML Firewall
- Web Service Secured using Industry Standards
- SLAs Enforced using Traffic Shaping and Throttling

Scenario Two

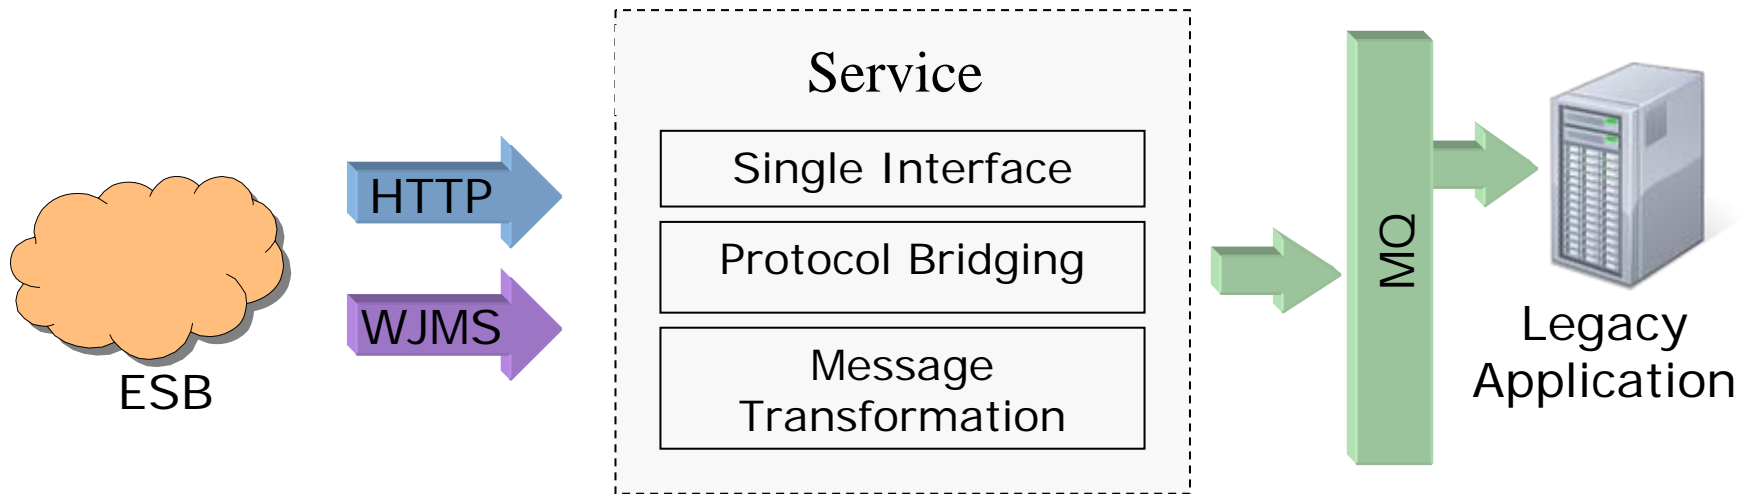

Legacy Integration

Scenario Two: Legacy Integration

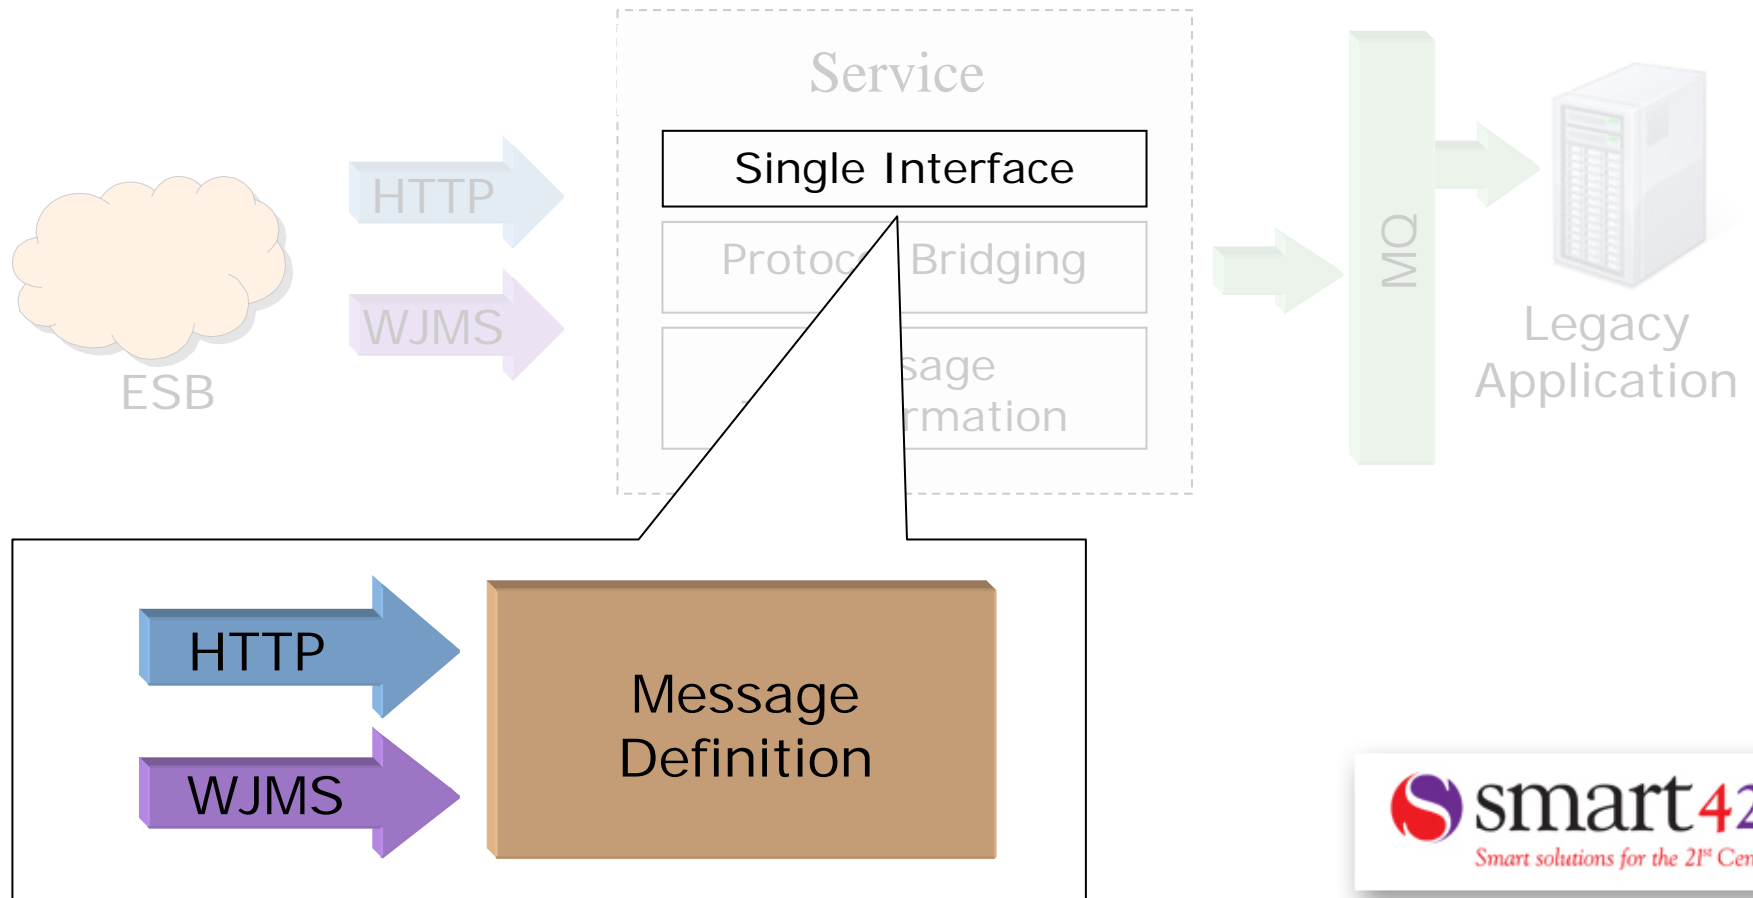

Problem

- Legacy Applications to be Exposed as Services via an ESB
 - Legacy Applications only able to expose MQ interface
- Services to be called using Multiple Protocols
 - Services called asynchronously and synchronously
- Proprietary Message Format Conversion
 - Legacy Applications use proprietary non-XML message formats

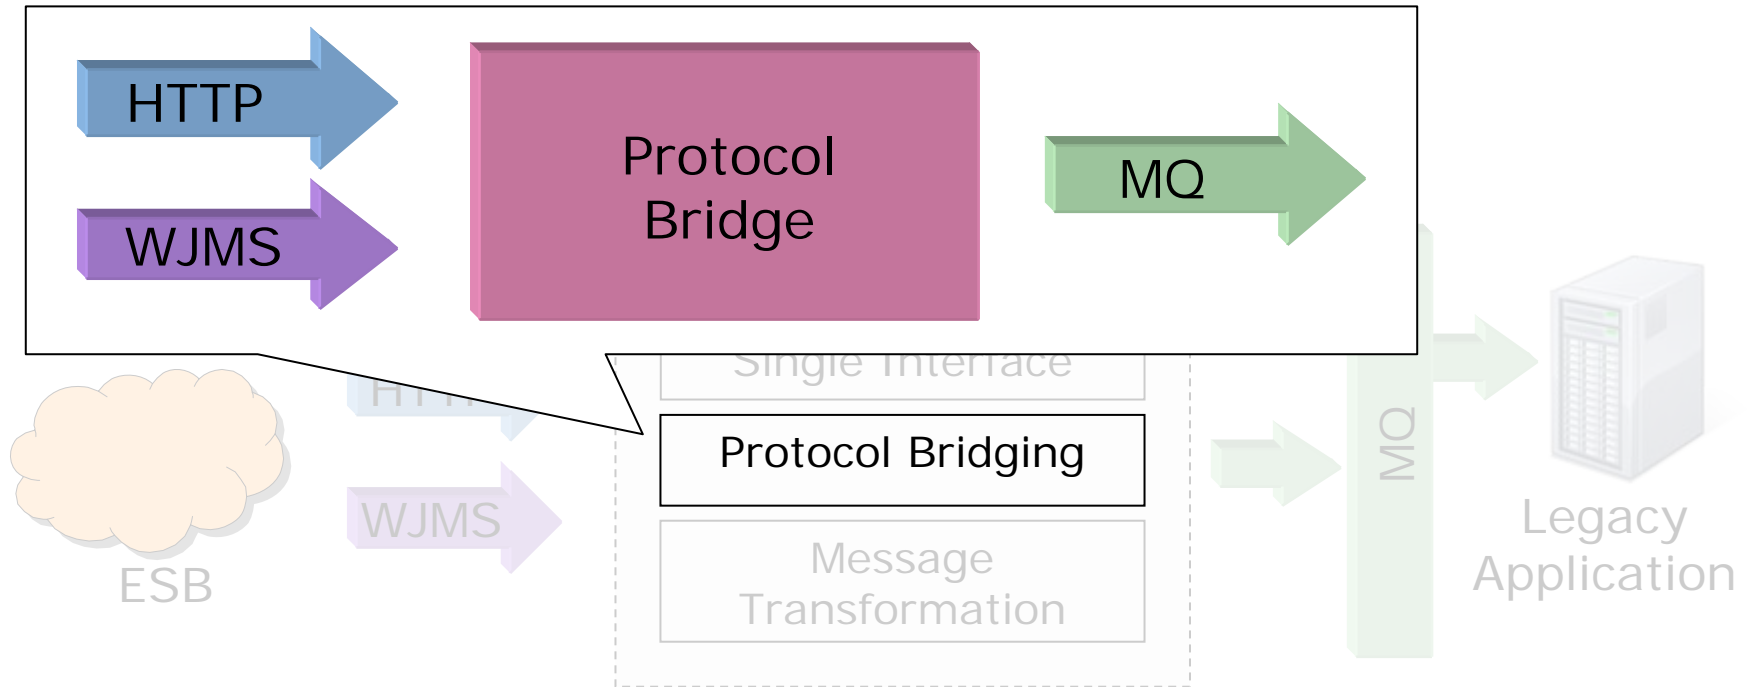

Scenario Two: Legacy Integration

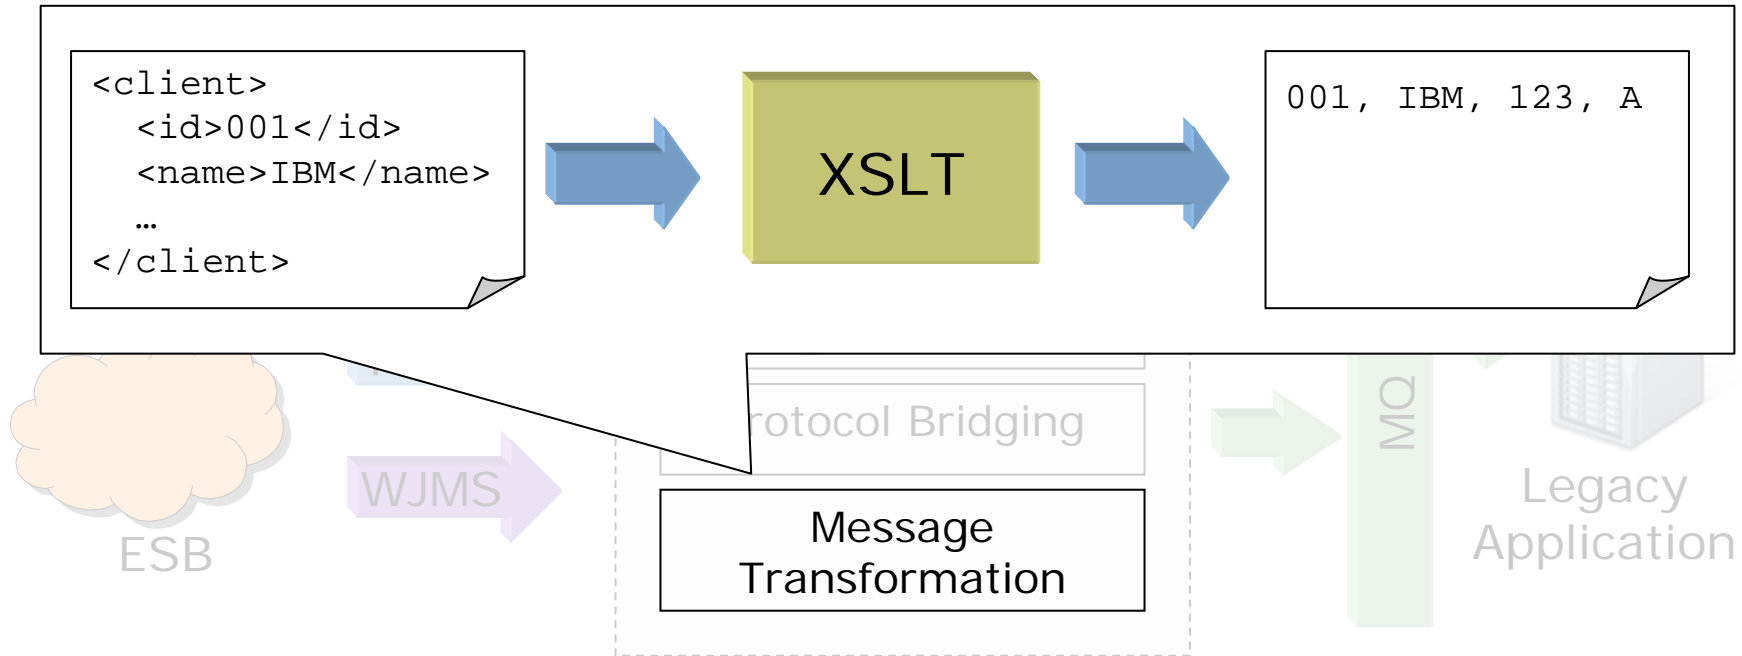

Scenario Two: Legacy Integration

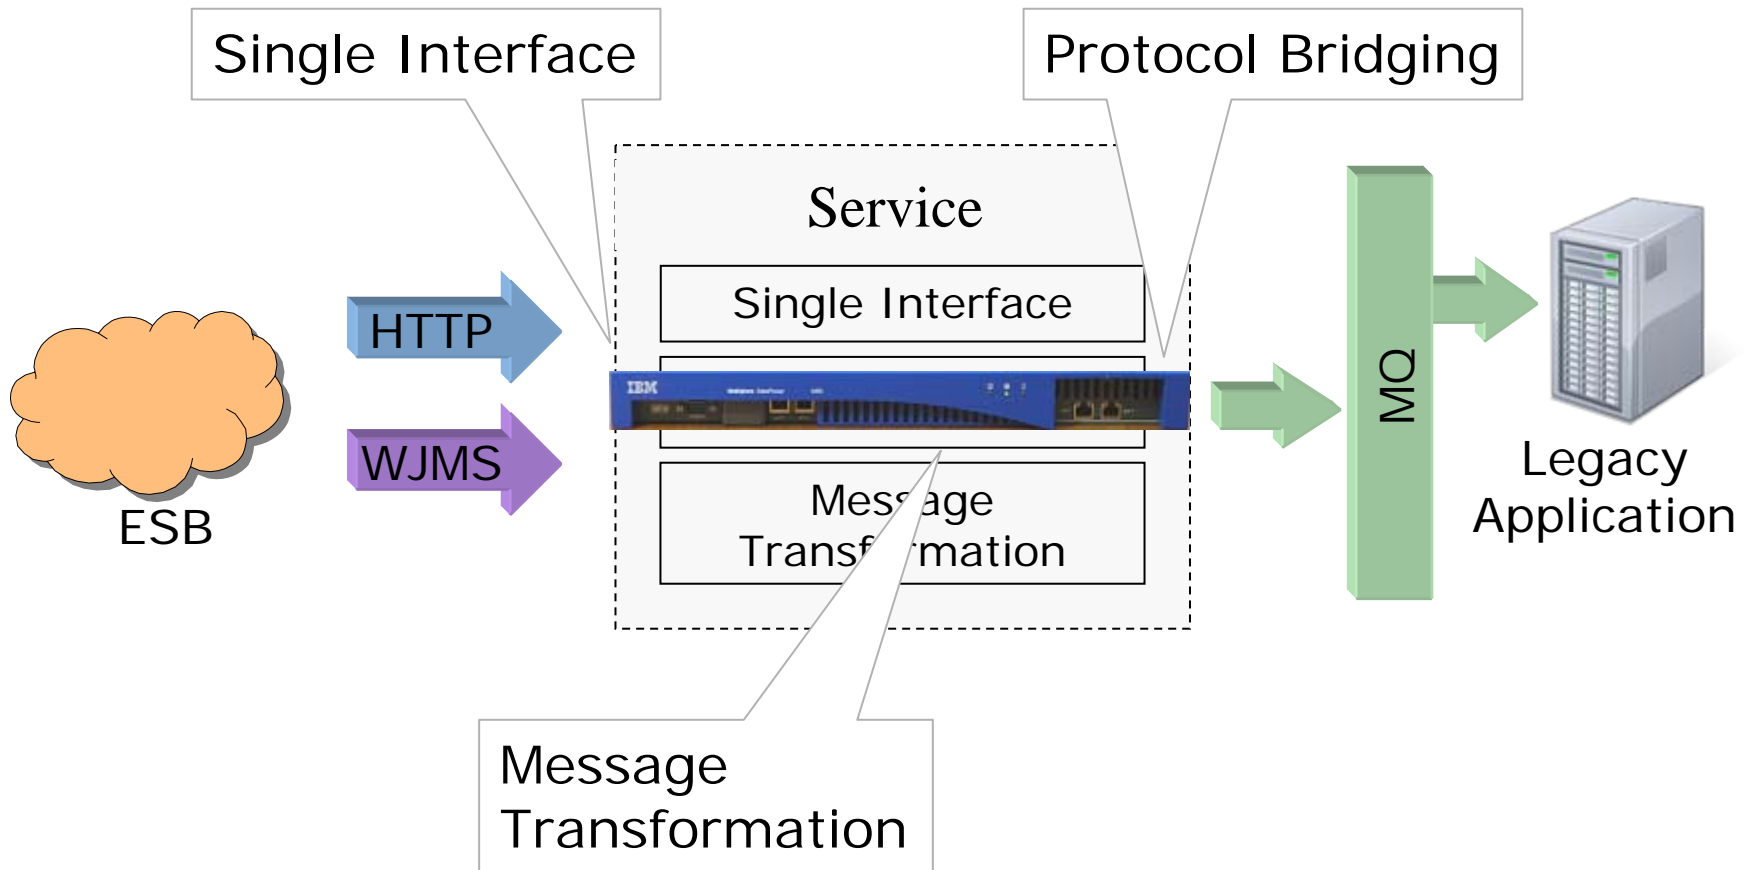

Scenario Two: Legacy Integration

Scenario Two: Legacy Integration

Scenario Two: Legacy Integration

Scenario Two: Legacy Integration

Solution

- Protocol Bridging between ESB and Legacy Application
 - ESB Protocol converted to MQ
- Single Interface Exposed over Multiple Protocols
 - Interface exposed as HTTP and WebSphere JMS
- Messages Converted between Formats
 - ESB Message converted to Proprietary format and vice versa

Scenario Three

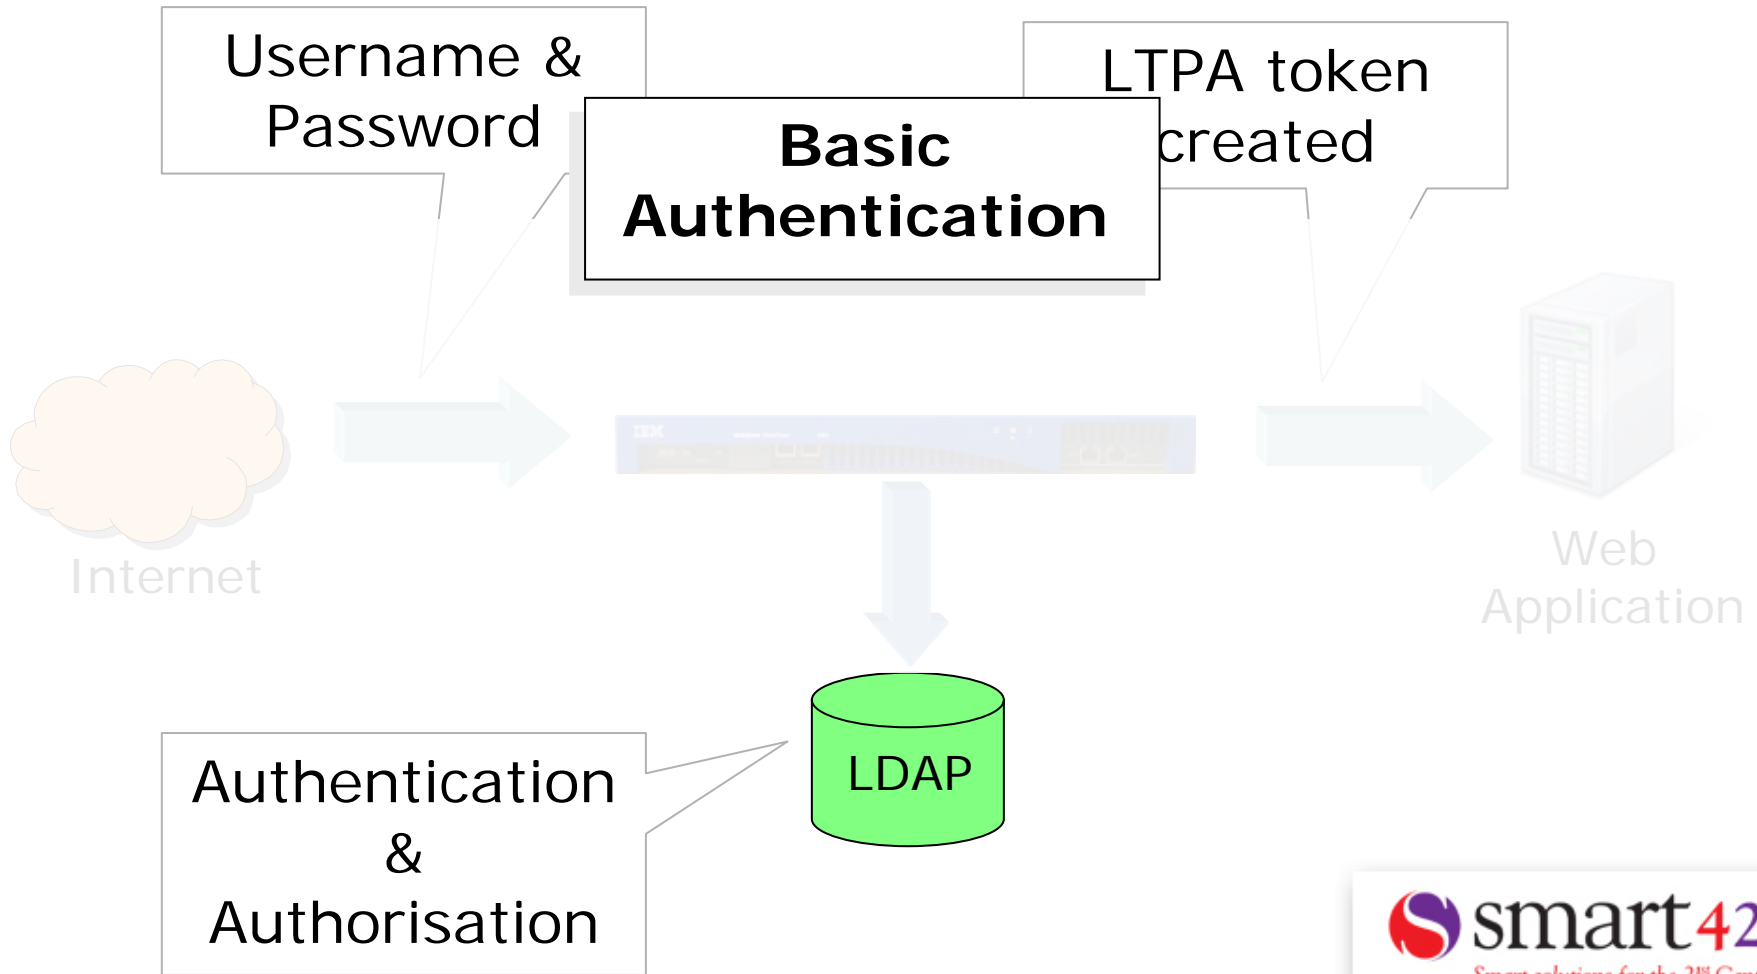

Securing Web Applications

Scenario Three: Securing Web Applications

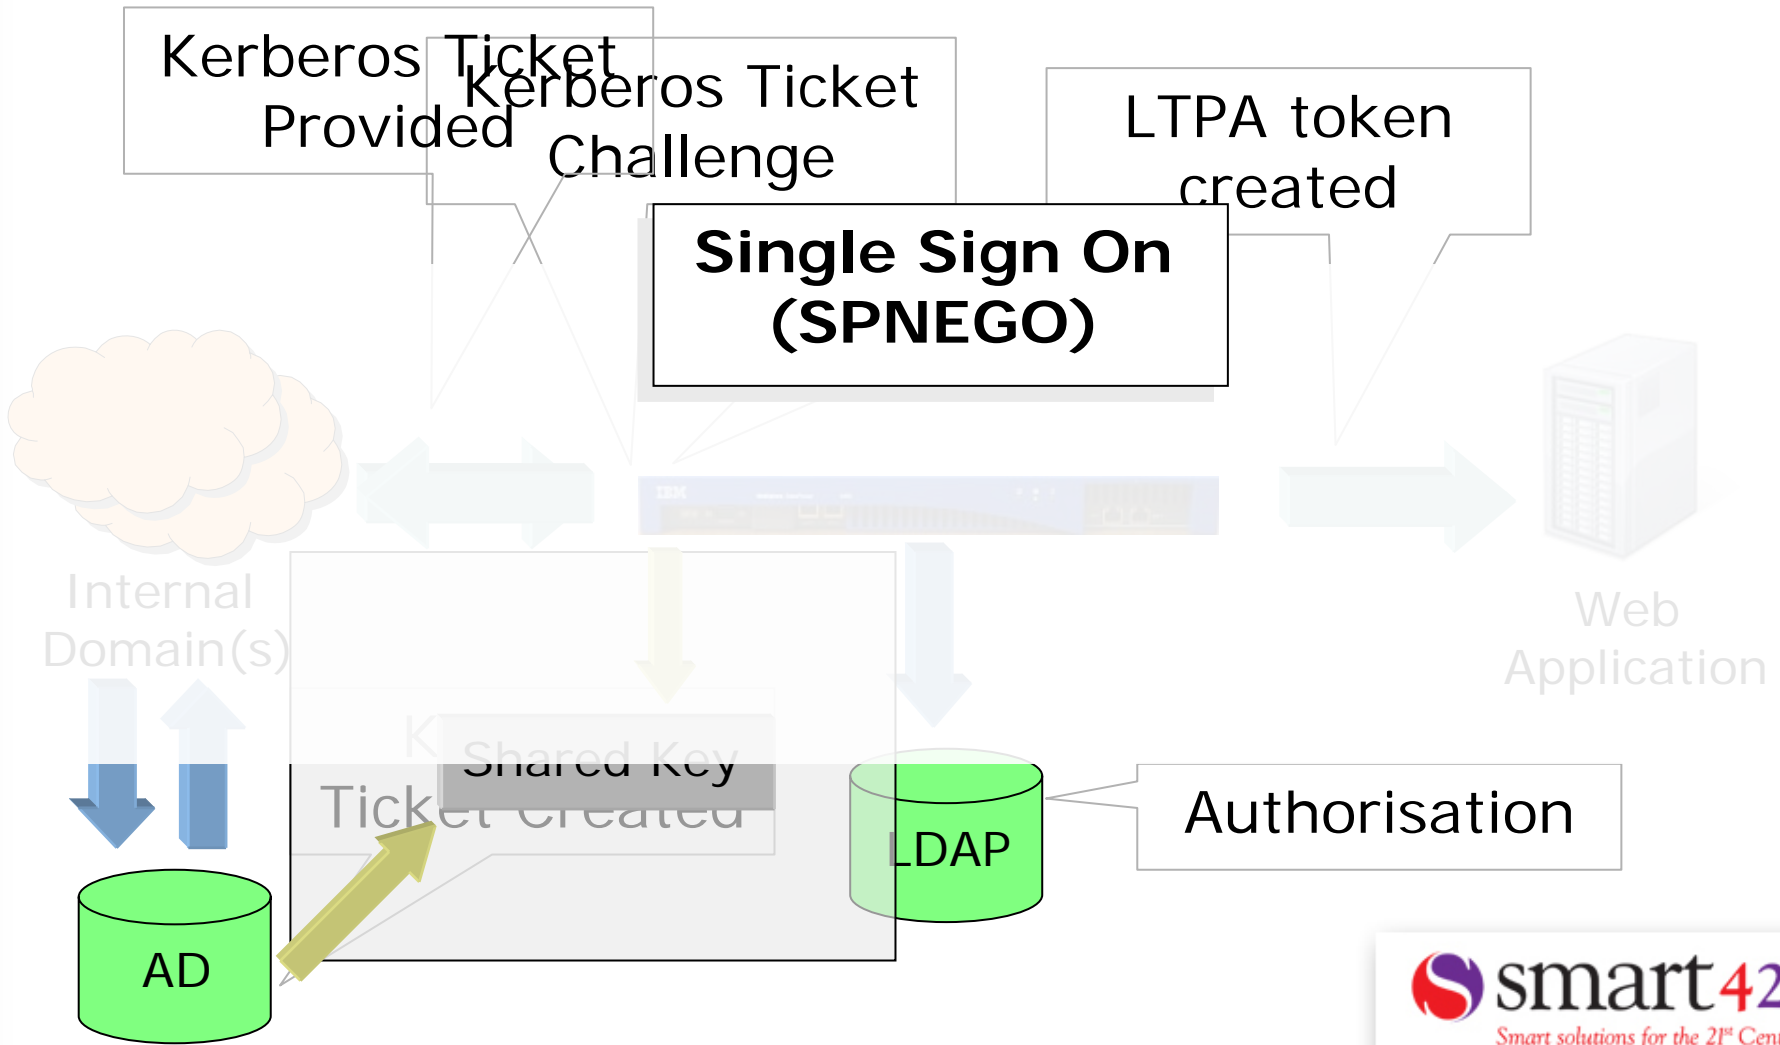

Problem

- Existing Web Application to be exposed externally
 - Unsecured Web Application
- Single Sign On Required by Internal Users
 - Users on Active Directory domain
- Authentication Required for External Users
 - No Single Sign On required

Scenario Three: Securing Web Applications

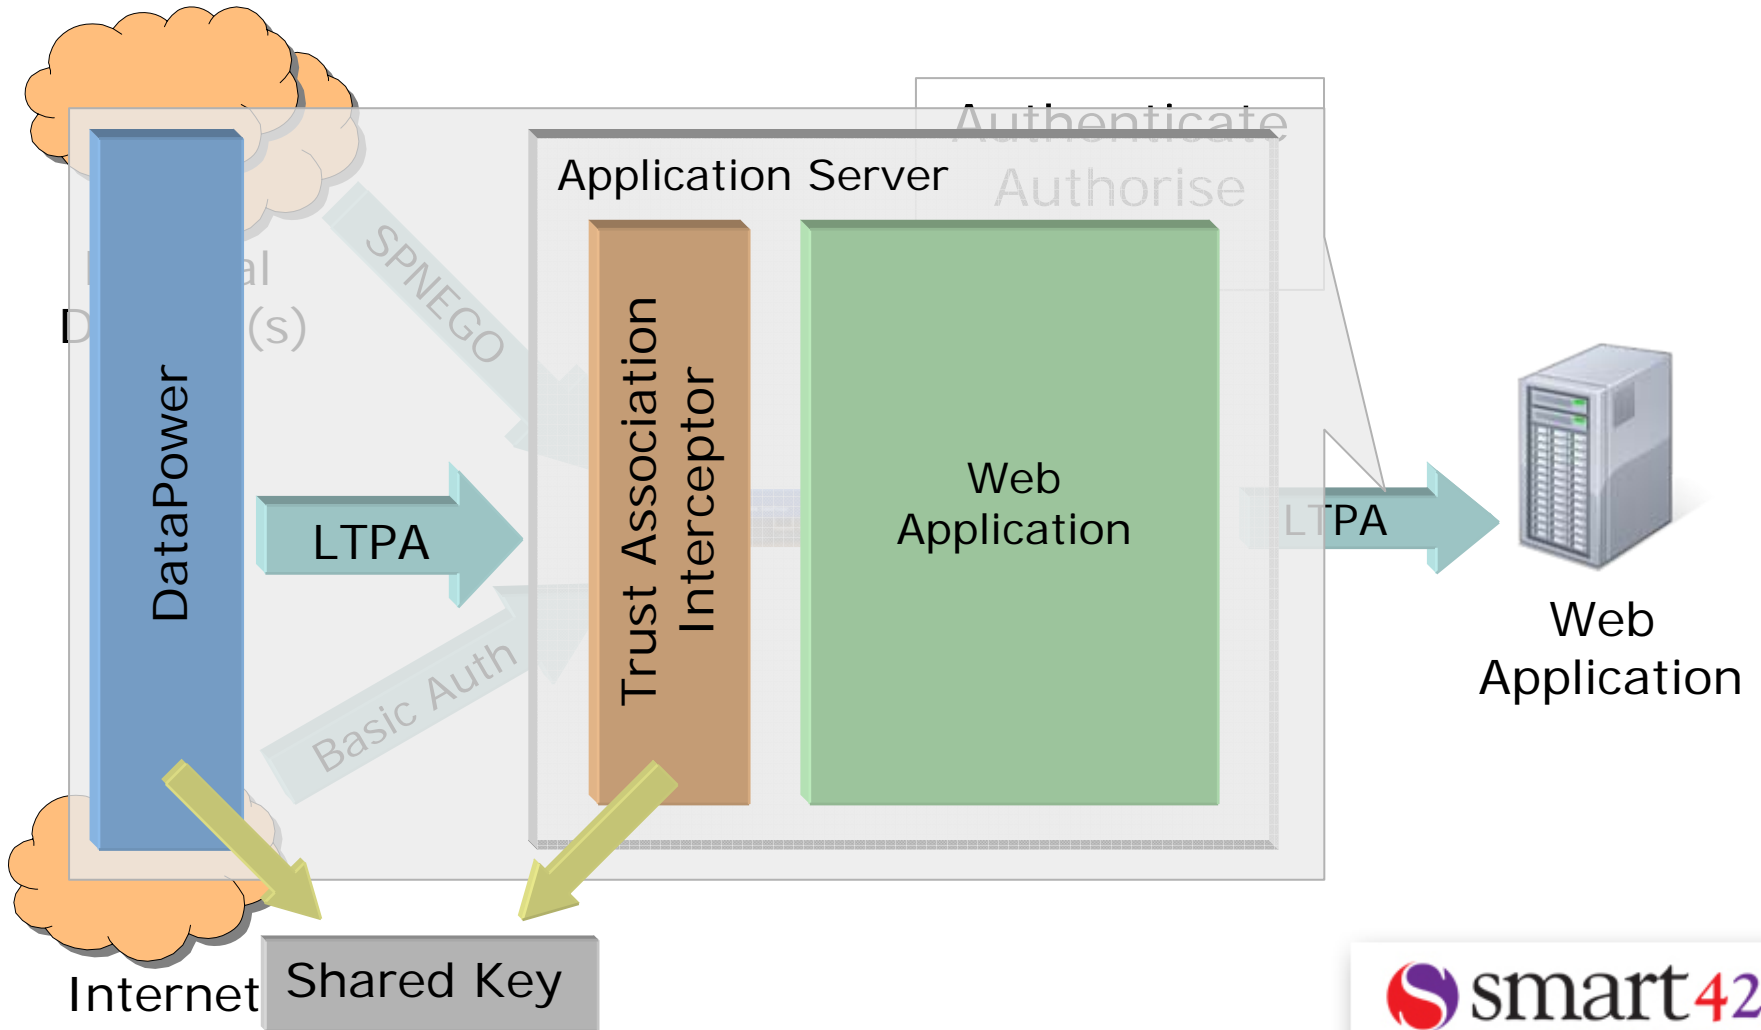

Scenario Three: Securing Web Applications

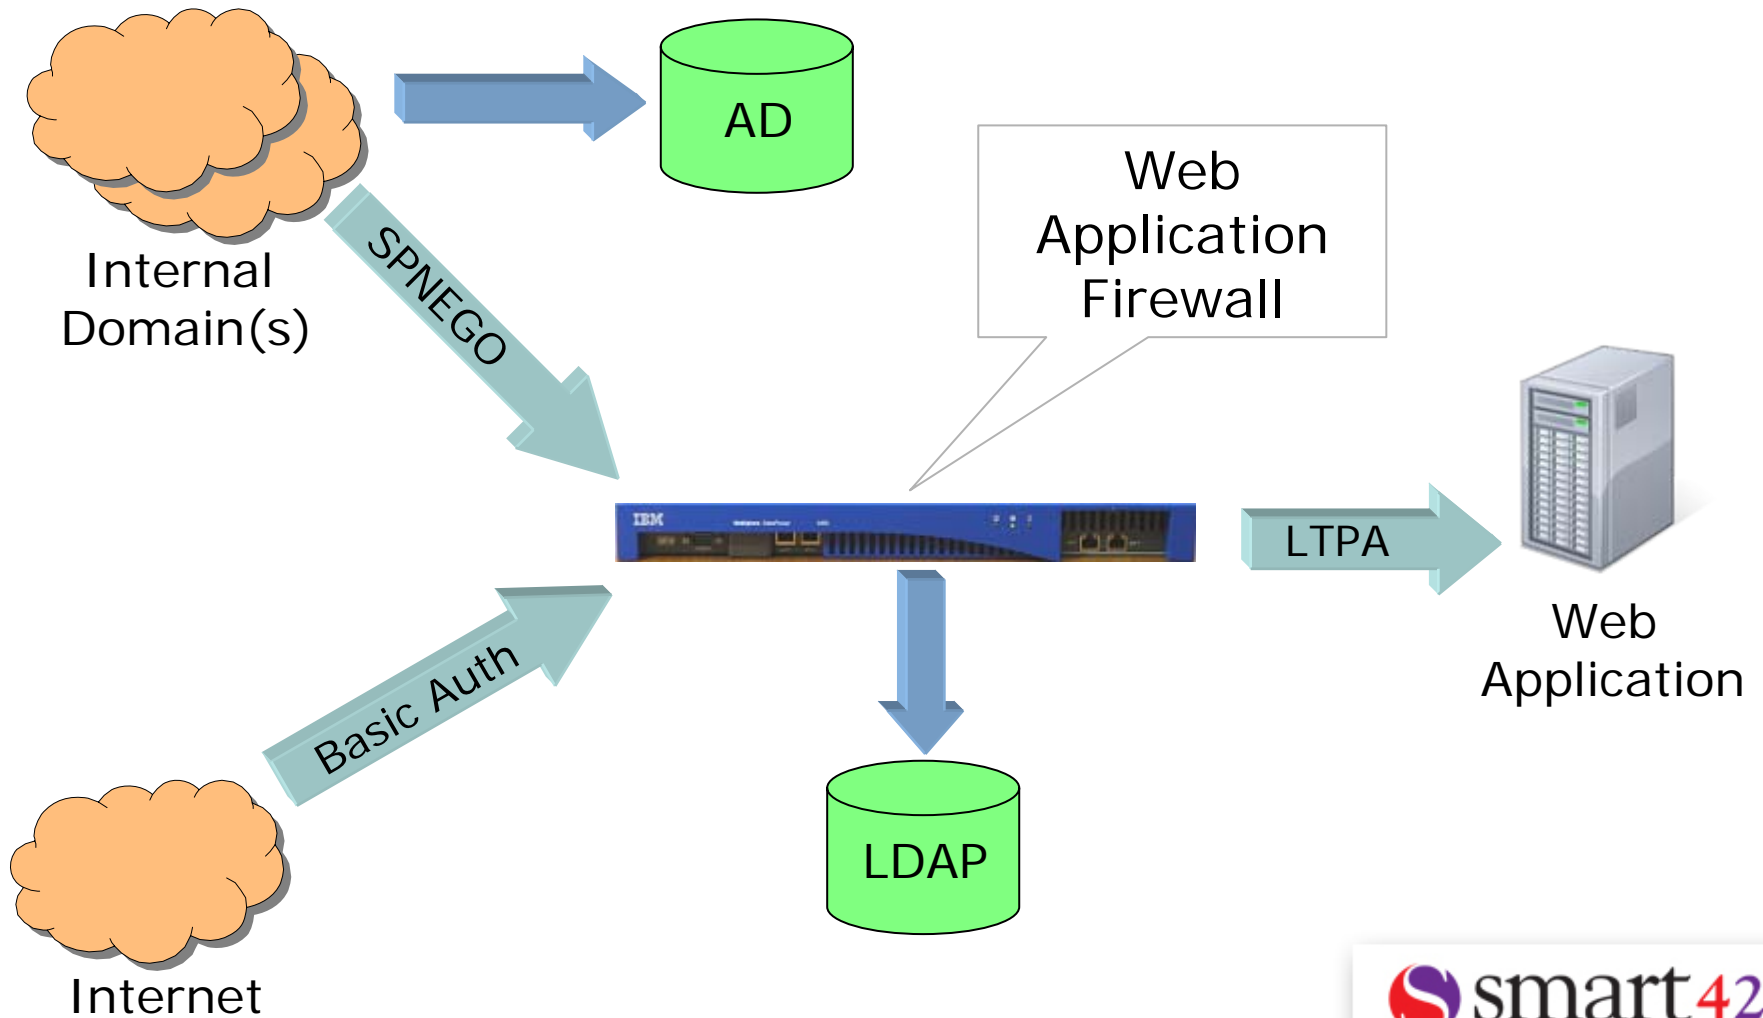

Scenario Three: Securing Web Applications

Scenario Three: Securing Web Applications

Scenario Three: Securing Web Applications

Scenario Three: Securing Web Applications

Solution

- Trust Association Created
 - LTPA used between DataPower and Web Application Server
- Single Sign On using SPNEGO/Kerberos
 - Available for Internal Users on company domain
- External Users Authenticated as Appropriate
 - Authentication and Authorisation against LDAP

Conclusion

- Acceleration, Security & Integration
- SOA Focused Functionality
- Numerous Applications within the Enterprise
 - Not Just a ESB Gateway or XML Firewall
